Therefore, it is suggested that you contact the appropriate municipal, township, or county zoning before construction is begun.

SECTION 3791.04 R.C. (EXTRACTED AND PARAPHRASED) It is unlawful to enter into contract for or begin the construction of a new building/structure, the alteration of or addition to an existing building/structure, and /or changing the occupancy of an existing building/structure before receiving approved plans for the municipal or county certified building department. If there is no municipal or county certified building department, approved plans must be obtained from the Division of Industrial Compliance. Construction of the building/structure must be in accordance with the approved plans, and with the other provisions stated in Chapters 3781 and 3791 Revised Code.

Once the plans have been examined and approved, a Plan Approval (permit) will be issued to the owner or applicant along with two sets of construction documents. One of the sets of construction documents must remain at the job site at all times during construction. Inspections can be obtained from the Building Department by calling at least one day prior to needing an inspection at (740) 374-4185.
